

Sanjeev Kumar

Date of birth: xx xxx 1992

Citizenship: Indian

Profile: A researcher working at the intersection of **physical optics** and **image/signal processing**, with a focus of understanding the bottleneck problems in **biomedical sciences**, which can be solved with quickly evolving optical and computational techniques. Highly motivated for developing a long term academic research career in “unconventional optical systems” and “light transport and associated inverse problems”.

Areas of Interest: Computational Microscopy, Computational Imaging, Optics, Mathematical and Computational Optics, Light Transport and Inversion, Optical Microscopy and Biomedical Optics.

Experience

<i>California Institute of Technology, USA</i> Postdoctoral Research Associate (Image Reconstruction)	July 2023-Present
<i>Singapore-MIT Alliance for Research and Technology</i> <i>MIT's research enterprise in Singapore</i> Postdoctoral Research Associate (Computational Microscopy)	Jan 2022-June 2023
<i>Massachusetts Institute of Technology, USA</i> Visiting Researcher (Computational Microscopy)	Oct. 2022-Dec. 2022
<i>Defence Institute of Physiology and Allied Sciences</i> <i>Defence Research and Development Organisation, India</i> Trainee (Biomedical Instrumentation)	June 2012-July 2012

Education

<i>Indian Institute of Technology, Kharagpur, India</i> Doctor of Philosophy (Lensless Holography) Thesis: Expectation-maximization based frameworks for holographic microscopy	2016-2021
<i>Indian Institute of Technology, Kharagpur, India</i> Master of Technology (Medical Imaging and Informatics)	2014-2016
<i>University School of Biotechnology</i> <i>Guru Gobind Singh Indraprastha University, New Delhi, India</i> Bachelor of Technology (Biotechnology)	2010-2014

Relevant Courses Taken

<i>Postdoc, MIT</i>	Computational Imaging, Computational Photography.
<i>Ph.D. IIT Kharagpur</i>	Advanced Digital Image Processing and Computer Vision, Machine Learning, Statistical Methods.
<i>M.Tech. IIT Kharagpur</i>	Digital Image Processing, Pattern Recognition and Machine Intelligence in Medicine, Molecular Imaging, Physics and Instrumentation of Medical Imaging, Biomedical Instrumentation, Optoelectronic Material and Devices, Optoelectronics based Instrumentation, MEMS and Biosensors.

Awards and Scholarships

- Received **Gandhian Young Technological Innovation (GYTI) award 2021**, a national level award in India, given to promote entrepreneurial ventures to motivate solutions for unmet social needs.
Project: A Low Cost Pocket-sized Digital Microscope.
- Received **Council of Scientific and Industrial Research (CSIR), India fellowship**. 2 years Junior Research Fellowship (JRF) and 3 years Senior Research Fellowship (SRF).
- Received Ministry of Human Resource Development (MHRD), India 2 year scholarship for Master of Technology.
- Secured **All India Rank 23** in Graduate Aptitude Test in Engineering (GATE) - 2014 in Biotechnology, a national level exam conducted for the eligibility and scholarship for postgraduate engineering studies in India.
Score: 817/1000, Percentile: 99.8.
- Secured **All India Rank 23** in CSIR National Eligibility Test (NET) - 2014 in Life Sciences, a national level exam conducted for the eligibility and scholarship for research studies in India.
- Secured **All India Rank 36** in CSIR National Eligibility Test (NET) - 2013 in Life Sciences.

Technical Skills

IMAGE PROCESSING	Physics-informed Neural Networks, Untrained Neural Networks (Deep Image Prior), Digital Refocusing, Iterative Image Reconstruction, Compressed Sensing.
COMPUTATIONAL OPTICS	Digital Holography, Coherent Diffractive Microscopy, Phase-Retrieval Algorithms, Interference Fringe Pattern Processing.
HARDWARE	Assembling Optical Imaging Setups, Interferometric setups, Lasers, Optical Fibers, Illumination systems, Objective Lenses and other Optical Elements, Image sensors, Raspberry Pi.
PROGRAMMING LANGUAGES	Python, MATLAB, C, L ^A T _E X.

Languages Known

- English (fluent), Hindi (first language).

Research Experience

- Developed a computational microscopy method of encoding the fluorescent neuronal cells located in a 3D volume (3D scaffold and 3D organ) in a single snapshot, followed by the volume reconstruction algorithm. (Postdoc).

- Developed an untrained deep neural network based method of defocus fringe suppression in coherent imaging. (Postdoc).
- Developed physics-informed neural network based method for single-shot phase retrieval, useful for diffractive imaging. Also demonstrated its effectiveness in extremely high quantization noise conditions. (Ph.D.).
- Developed compressed sensing principle based iterative frameworks for single-shot holographic tomography and single-shot phase retrieval, in lensless diffractive imaging setups. (Ph.D.).
- Showed that high resolution holographic microscopy is not limited to high coherence light sources, as believed conventionally. (Ph.D.).
- Showed that photonic crystal fiber is a good illumination source for holographic microscopy, for improvements in resolution and magnification. (Ph.D.).

Other Minor Projects

- Deep prior based computational super-resolution applied on fourier ptychographic microscopy datasets (worked with online datasets).
- Coded aperture lensless imaging in passive illumination.
- Influence of exposure time and image fusion on lensless microscopy.

Publications

Manuscript under review

1. **Sanjeev Kumar**, Chongquan Huang, Zheng Li, Vincent Lin, Sing Yian Chew, Rajeev J Ram “Caustic wavefront encoded imaging for snapshot 3D fluorescence microscopy” (under review at Nature Communications). ([click here](#))

Journals/Conference Proceedings

1. **Sanjeev Kumar**, Zheng Li, Chongquan Huang, Vincent Lin, Sing Yian Chew, Rajeev J Ram, “Exploiting caustics for snapshot 3D fluorescence imaging in wide-field microscopy”, Computational Optical Sensing and Imaging (COSI), Optica Imaging Congress, 2023. ([click here](#))

Archives

1. **Sanjeev Kumar**, Manjunatha Mahadevappa and Pranab K. Dutta “Geometric solution of image degradation by diffraction in lensless sensing and microscopy”, arxiv.org, 2020. ([click here](#))

Reviewer

- Optics Letters, Optics Express, Journal of Biomedical Optics.

Invited Talks

1. Invited talk at MIT on the topic “Snapshot 3D Fluorescence Microscopy with Caustics”. September 2023 (online).
2. Invited talk at Singapore-MIT Alliance for Research and Technology (SMART) on the topic “Holographic Microscopy”. January 2021 (online).

Teaching Assistant

1. Digital image processing lab at IIT Kharagpur (July-Dec. 2018 and July-Dec. 2019).
